

Extralearning Online™ 2008 Version

Teacher Level >> Library

The **Library Tab** opens a *searchable* library of resources. Select a Channel (the High School channel, for example) then find resource matches by (a) Level and Subject, or (b) by Keyword Topic, or (c) by State Standard, or (d) find your own Customized content. You can also browse Assessments, jump to a third-party content partner's web site, or download e-Books for printing. (For 2007 version selections, choose the Classic Extralearning Channel).
